

Plates

Convergent	Plates come together	Mountains
Divergent	Plates pull apart	Volcanoes
Transform	Plates slide past each other	Faults

Rocks

Sedimentary	Made from sediments, weather, erosion, cementing back together.
Igneous	Made from volcanoes, melting and cooling of rock.
Metamorphic	Made deep within the earth from heat and pressure.

Layers

Crust	Thin rocky, outer layer.
Mantle	Thick liquid rock layer.
Outer Core	Layer of melted iron and nickel.
Inner Core	Center, most pressure and heat, solid iron and nickel.
